

Series 100 Standoff Kit

The SnapNrack Series 100 Standoff Kit is an innovative solution for use on tile roofs or other thick roofing materials. Standoff Kits are engineered to ensure maximum standoff adjustability for a clean, level installation on the most irregular roof surfaces. Every roof attachment gets a full metal flashing to ensure worry-free weather proofing for the life of the system.

- 5.5", 7", 8.5", and 10" Standoff Shaft lengths
- 1" spacers available to provide additional flexibility
- Recommended use with Series 100 Standard Rail for attachment to tile or built-up type roofs
